Family Friendly Climate Control

Personalise your home's comfort with Rinnai Home Controller

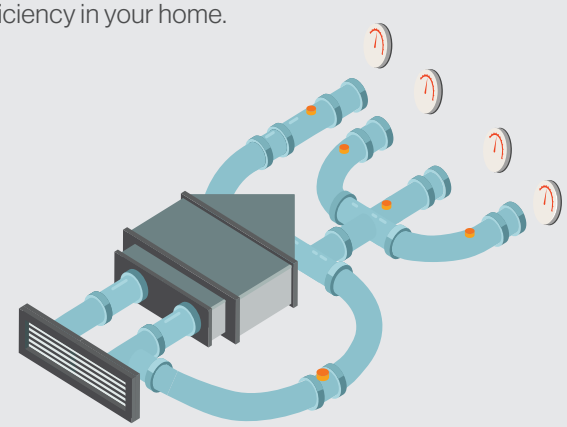
Step into a world of comfort with Rinnai Smart Air Conditioning. Our Rinnai Home Controller is not just efficient and costeffective, it's also all about personalising your home's climate. Imagine keeping every room cozy or cool, exactly how you like it, with precision control for up to 8 zones. And with our real-time adjustments, your home will always feel just perfect.

Unlock savings through our climate by design

Embark on a journey of comfort and savings with our tailored temperature control options. Whether you're looking to spend a bit more upfront for long-term efficiency or prefer immediate savings, we've got you covered. Our unique Advanced Constant Control means our system fits perfectly in your home, bypass control included or not. It's all about giving you the perfect balance of comfort and savings.

Bypass Control for enhanced energy efficiency*

Rinnai Home Controller's Bypass Control cleverly manages excess air, channelling it away from zones to avoid overpowering drafts. This ensures a consistent climate across all rooms. With precise airflow matched to the exact room size, it's the smart way to enhance comfort and energy efficiency in your home.



Setting the benchmark for precision climate control

Welcome to a new era of degree perfect climate control. The Rinnai Home Control System empowers you to be the master of your own home, adjusting airflow from a whisper to a breeze, anywhere from 0% to 100%. Our system cleverly calculates the precise amount of air needed for each room by considering its exact size for just the right air distribution. The advanced constant control methodology sets the industry standard for innovation, allowing each room to receive air tailored to its unique dimensions.

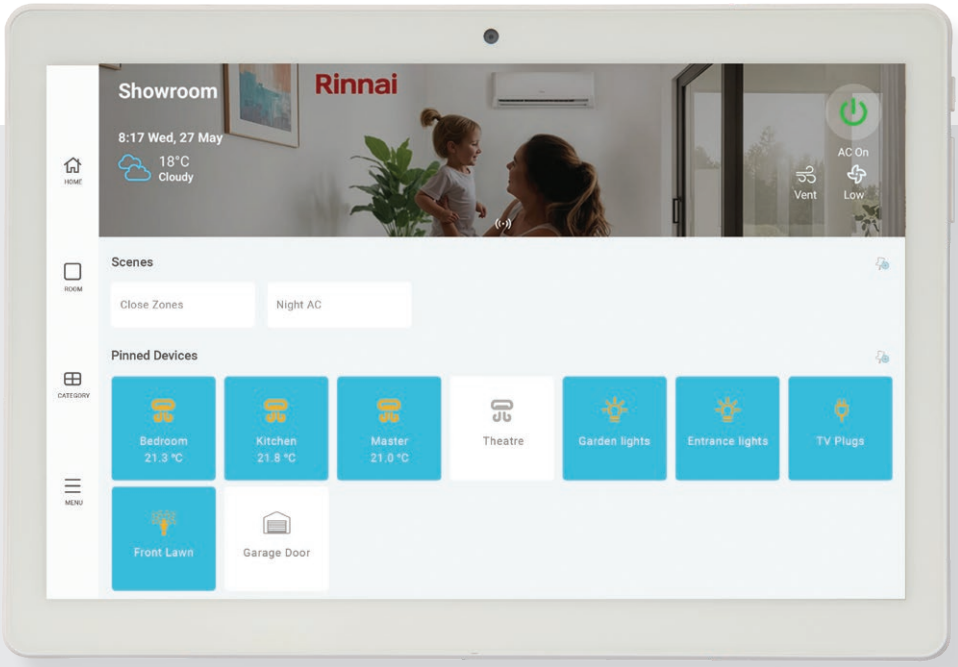
Maximise savings with intelligent temperature management

Rinnai Home Controller transforms climate control with intelligent sensors that efficiently redirect heated or cooled air between rooms, ensuring rapid achievement of set temperatures. Unlike systems using a single sensor for an entire home, Rinnai Home Controller automatically scans all your sensors to optimise comfort in each room. This smart technology not only enhances your in-home comfort but significantly reduces running costs, setting a new standard in personalised climate management.

The intuitive Rinnai Home Controller is easy to customise

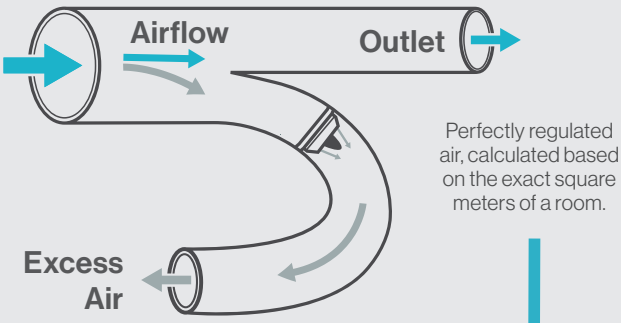
Effortlessly tailor your Rinnai Home Controller Home app to your lifestyle. Pin essential zones and devices for quick access, invite family members to customise their screens, and organise everything into convenient 'rooms'. Create 'recipes' for automated actions and view multiple Rinnai systems and air conditioning units on one intuitive, personalised screen. This is simple smart climate control at its best.

*Bypass control must be configured by the installer.



Some of the controls shown here together.

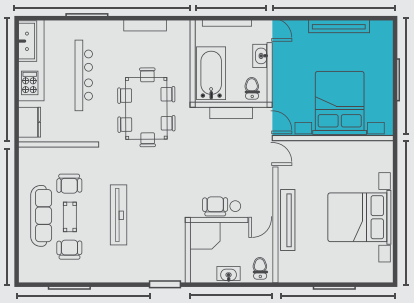
- 1-8 Zones for as many rooms.
- Personalised Scenes.
- Zone temperature.
- Fully adjustable fan speed.
- Mount portrait or landscape.
- Multiple owner profiles.
- Arrange your home screen.
- Recipes of actions and triggers.
- Personal home screen image.
- 7 inch or 10 inch screen.



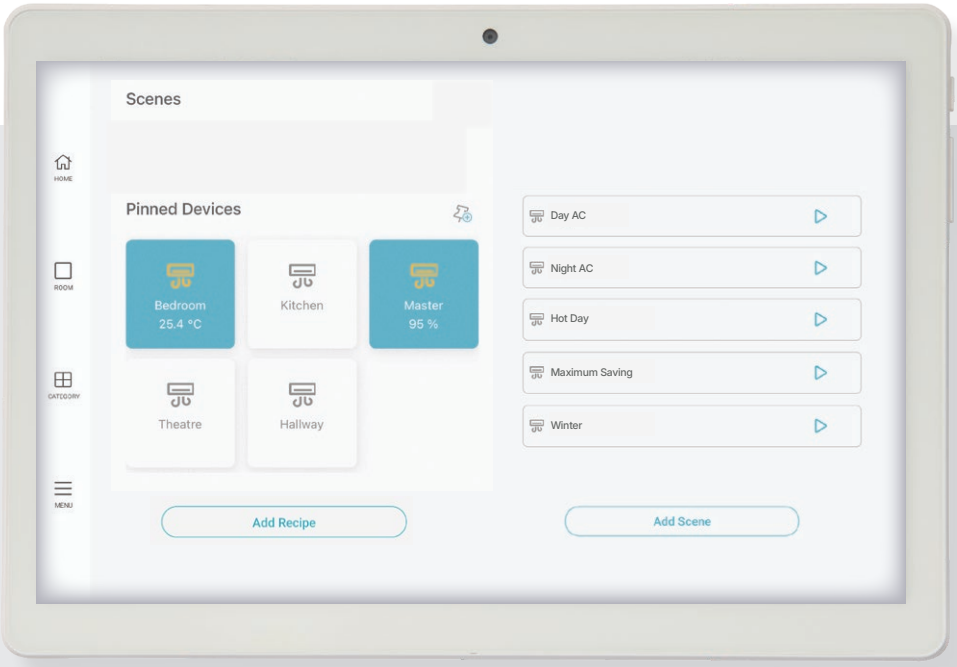
Perfectly regulated air, calculated based on the exact square meters of a room.

Diverted excess air leaves through a constant vent with 1 degree accuracy using Rinnai Home Controller's advanced constant control algorithm.

Rinnai Home Controller accomplished this remarkable capability through extensive years of engineering dedication.



Monitor Energy Usage



- Create triggers & actions.
- Scrooge Mode.
- Forecast settings.
- Monitoring reports.
- Energy savings modes.
- Auto off options and set points.
- AC Bypass control.
- Rinnai Home Controller's inteligent control.
- Fresh night air integration.
- Reduce costs with auto actions.

Rinnai Home Smart Monitoring simplifies energy savings for your home

Streamline your energy use and trim your bills with Rinnai Home Smart Monitoring. Keep tabs on appliance consumption and cleverly align their operation with offpeak tariffs to reduce costs. If you have solar, you can maximize free daytime energy to further cut expenses.

Scrooge Mode and Fan Auto Control are your wallet's best friend

Embrace your inner scrooge with Economy Settings, allowing you to set temperature boundaries, like 22 to 24 degrees. Everyone can still adjust the temperature, but only within the 'scrooge range', helping you keep a tight leash on energy usage and bills.

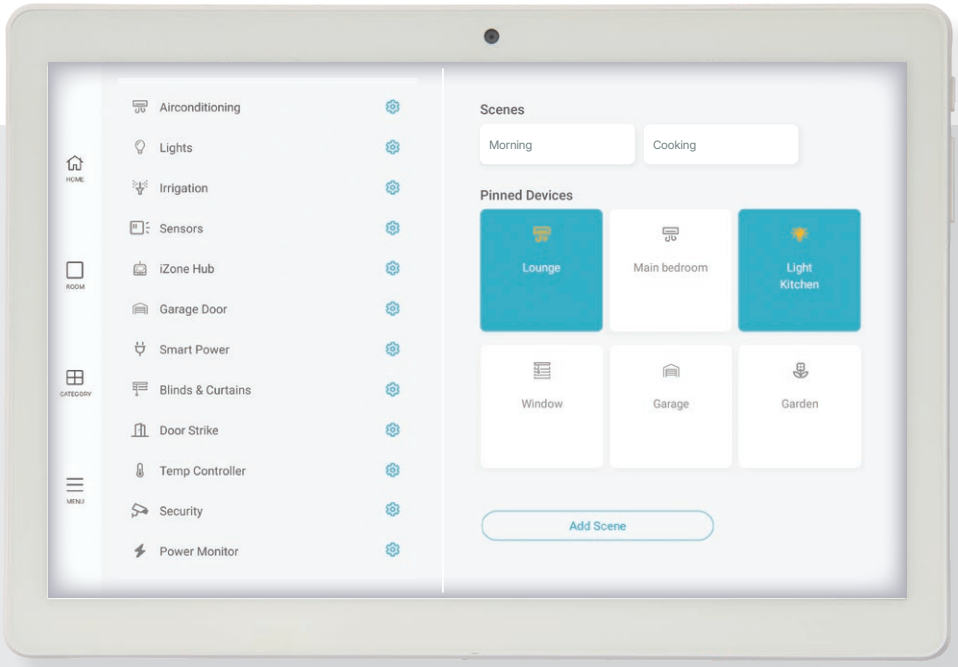
For more smart energy savings, Rinnai Home's Fan Auto Control automatically adjusts the system's fan speed according to how many zones are being heated or cooled. It's convenient, efficient, and wallet-friendly!

Embrace the future of home energy efficiency

With the Rinnai Home Climate Control System, you're not just getting a state-of-the-art air-conditioning system; you're stepping into the world of advanced, customisable smart homes. Imagine extending this energy-efficient, anywhere-anytime control to your lighting, irrigation, entertainment, and even non-Wi-Fi devices like garage doors and blinds.

By integrating and controlling all these aspects of your home, you could easily reduce your energy bills. Rinnai Home isn't just about managing your home's climate; it's about empowering you with a full suite of timesaving, energy-conserving, and planet-friendly features for a truly smart home experience.

The Rinnai Home Control System Evolves with your Household



Design your unique climate control system with Rinnai

The Rinnai Home Climate Control System evolves with your household, perfectly aligning with your changing needs and budget. Start simple by controlling a single smart device, then seamlessly advance to managing multiple zones, schedules, and smart devices with our integrated recipes.

Rinnai Home isn't just another system; it's a bespoke solution that adapts to your lifestyle and budget changes, allowing for future growth without a full system overhaul.

With its energy-efficient design and cost-effective zone control, the Rinnai Home Climate Control System offers a range of affordable, energy-saving options, each tailored to fit your needs and ensure your family's comfort.

Secure, smart home privacy you can trust.

Rinnai Home protects your privacy by integrating robust, industry-leading security into every aspect of your smart home.

Our touchscreen controllers, designed with embedded firmware, ensure your data is secure and free from internet vulnerabilities, while transparent data practices and user-friendly controls give you the power to make informed decisions, keeping what happens in your home, in your home. Trust Rinnai Home for seamless, secure smart home experiences that prioritise your family's safety.

At Rinnai, We're All About Comfort

For over 50 years, Rinnai has supplied Australian homes with a range of appliances that help people lead comfortable, safe, and efficient lifestyles.

Being driven to create comfort means that we really care about your experience with our products. We design products with reliable technology and quality construction, ensuring dependable performance in everyday use.

1stCare

We're At your Service

1stCare, Rinnai's national service network, provides expert service and service maintenance for Rinnai Group units, including Rinnai, Brivis, APAC, Polo, and select iZone and Kaden products. Our fully qualified technicians use only genuine spare parts for fast, reliable service.

Service, repair, and warranty assessment works are conducted 8:30am – 5:00pm AEST, Monday to Friday (excluding public holidays).

Call us on 1300 555 545 or book a service online

Optimising Performance

Follow the service maintenance schedule applicable to your product and carry out any routine user maintenance as outlined in the Operation Manual and/or Warranty Booklet provided. These simple steps help keep your units efficient and reliable, so you can enjoy the full Rinnai experience year after year.
