

## Rinnai Home Controller

Control your Ducted Air Conditioning System with ease from your smart device with Rinnai Home Controller, our latest in climate control technology. Rinnai Home's intelligent sensors will redirect conditioned air from one room to another, so rooms reach their set temperature as quickly and efficiently as possible. Each zone is controlled individually with the added benefit of having different temperatures in each zone. With intelligent Fan Auto Control, Scheduling Assistant and Favourite programs, Rinnai Home Controller enables a more energy efficient and cost effective solution to the heating and cooling of your home.

### Superior User Experience

Customisable user interface with intuitive smart home features and functions, accompanied by a Smart phone app for remote access.

### Premium Slimline Display

10" display mounted as either landscape or portrait.

### Rinnai Home Dongle/USB

Control up to 16 Rinnai PB Series Hi-Wall Split Systems with ease using the Rinnai Home Dongle. This smart device enables seamless Wi-Fi connectivity to the Rinnai Home platform for fully integrated air conditioning management.

### Control Multiple Rinnai Systems
