

# Enviroflo A Series Heat Pump

## EHPT180VM

### ERROR CODES

| Fault Code | Description  |
|------------|--|
| E0         | Parameter error fault  |
| E1         | Water temperature sensor   |
| E2         | High voltage fault   |
| E3         | Fin temperature sensor   |
| E4         | Ambient temperature sensor   |
| E5         | Return air temperature sensor  |
| E6         | Exhaust temperature sensor   |
| E7         | Low pressure protection  |
| E8         | Hot water temperature sensor   |
| EA         | High temperature protection of compressor exhaust air                  |
| Ed         | Antifreeze protection  |
| Et         | The ambient temperature is not in the operating range of the heat pump |
| EE         | High compressor current  |

| Fault Code | Description            |
|------------|------------------------|
| Eb         | Low compressor current |
| EF         | Communication fail     |
