

## Gas Continuous Flow

### Flowmaster 10

#### ERROR CODES

Problem	Fault	Action
Burner does not ignite, or is difficult to ignite	No gas supply	Check gas is turned on at water heater and gas meter or cylinder
	Low battery power	Replace battery
	Other	Service call
Pilot lights but no main burner	Low water pressure	Check water pressure
	Low battery power	Change battery
	Run out of cylinder gas	Replace gas cylinder
	Other	Service call
Low water temperature	Low gas pressure	Check gas pressure. To be carried out by an authorised person only
	Run out of cylinder gas	Replace gas cylinder
	Excessive water flow rate	Reduce water flow from heater (Turn water lever clockwise)
	Other	Service call
Low water flow	Low water pressure	Check water pressure to appliance
	Blocked outlet fixture	Check and clean
	Other	Service call
Problem	Fault	Action

Cuts off when operating	Interrupted gas supply	Service call
	Run out of cylinder gas supply	Replace gas cylinder
	Other	Service call
Smell gas	Faulty / loose gas connection	Service call
Water leakage from appliance	Damaged components and connections	Service call
	Frost damage	Service call
Water leakage from pressure relief valve	Excessive pressure	Check water supply pressure
	Faulty pressure relief valve	Service call
